

Mkongoro.1 gravity water supply scheme Layout

Description of Project Location

The Mkongoro.1 gravity water supply scheme consists of five water storage tanks situated along the tarmac road to Buhigwe District from Kigoma town. The new intake at Nyete river and treatment plant are in Mkongoro Village, approximately 30 km from Kigoma Town. The proposed intake at Nyete River is about 2.5 km north of Mkongoro Village, at coordinates -4.664533, 29.728398. The layout illustrates the locations of the intake and water storage tanks. The water treatment plant is situated approximately 120 meters before reaching the new intake at Nyete River.

The access road is next to one of the five tanks at Mkongoro village.

Pictures of the intake structure can be found below.
